

Sewing Cuffs onto Gowns

	<p>Step 1: First sew a rolled hem on the cuff edge of the sleeve to help with fraying</p>		<p>Step 2: Pin the elastic edges to the sides of the fabric where it will go</p>
	<p>Step 3: Pin the middle of each together as well to mark where it should line up</p>		<p>Step 4: Lock stitch the start (no stretching)</p>
	<p>Step 5: Grab tightly where the middle pin is and pull the elastic until the fabric isn't bunched. Sew a few stitches, then you can use your other hand to grab the back and pull tight in both directions</p>		<p>Step 6: You can pinch and pull wherever, just make sure the fabric isn't bunching</p>

Sewing Cuffs onto Gowns

Step 7:
Lock stitch at
the end (no
stretching)
and voila!

This is what
it looks like
